By PATRICK

In a surprise appearance before 160,000 workers of the Coalition at Chamber,
Cancer Monday night, Mike Boich, for many years an ardent sup-
porter of the C.R.E. in New York, announced that he was with-
drawing all his support from the present administration and
Johe-
K. Kennedy, for mayor.

Representing himself as president of the...

**Common Summer Skin Condition is Dermatitis**

By DR. HARRY SHEHAN

During the warm weather, and especially during the hot, humid climate, a common dermatological condition of the skin arises in the form of local or general irritation, accompanied with intense itching, vesiculation or small blisters, redness and pain.

The condition is known to the physician as dermatitis of the skin. It may appear localized, confining itself to the area of a small part of the body, or it may become generalized, spreading over the entire body.

There are several types, or varieties of this condition, but the two most common varieties are dermatitis herpetiformis and dermatitis minor.

The former type of the dermatitis minor is characterized by the fact that the skin can be touched directly with润湿 agents and cleansers without irritation.

College Grads Need Good Phone Voices

The sales and service man must have a good telephone voice in order to succeed in the business world, according to prominent directors of Ohio University.

The University officials explain that this quality is necessary because sales men are in constant need of telephone service.

Cupid Loses All Track of Time, Takes June Deluge of Weddings, Engagements: On Over Into July

By LUBETH

For those sweet young things who dance through the dog days just as lightly as they do through the cherry blossoms, there are many pretty frocks.

They can be as delicate as they like in black, red and lace—shorter than ever important, and becoming, of course, their softest blues, greens and yellows. Here are the pretty things that best suit skirt and shoe—three very effective, very sunny and then there is black, but always very lovely.

Barbara Good and Bessie Gray have been chosen to illustrate this article. These are the two who made such a hit with the ladies in the picture, "Two Smart Girls," two years ago.

They have a choice of two or three dresses for this coming Saturday, with white, whiskers, sightly shaded and slanting, with blue and white, and white and yellow shades of ribbon and flower-cut bits, give the finishing touch to this dress.

Pretty Fashion

By the way, that is one of the prettiest touches of the present season. Sheen or shine, dress is even with morning or evening dinner, and, especially, of course, with formal frocks, for it is very niftily suited to evening.

It is a good idea to keep a few of these in your wardrobe because they can be worn over almost anything.
Automobile Parking Hazards
A BULLETIN recently issued by the National Board of Fire Underwriters points out that automobile parking on streets is becoming one of the great menace to effective fire service. This is particularly true in business and manufacturing districts, and around apartment houses and the like.

The hazards of parking an automobile, either on the street or in the driveway, are so much the greater since the number and size of the cars are continually increasing. In the busy business sections of large cities a car may be abnormally crowded with passengers and their luggage. In addition to the danger to life and limb that is involved, the chances of fire are increased where cars are parked near buildings or not far from them.

NO BELLS—The weather getting warmer warmly warms our hearts in Washington, but there still exist a few hot spots that can cause considerable uneasiness. The fire and street department are more than likely to be heard of this again. They have installed new sound systems in various parts of the city. It is expected that they will be heard around the city, including the suburbs. They are expected to be heard in all parts of the city.

WAGES AND HOURS BILL—The bill for establishing an eight-hour day for employees in the public service is now under consideration of the Senate. It is expected that this bill will pass. The Senate is expected to pass it.

PROPRIETARY AWARD—The proprietors of the Liberty Electric Company have decided to award a prize of $500 for the best design of an electric car. It is expected that this award will be given to the Liberty Electric Company.

The Saturday Letter
To the Editor:

Dear Sir:

I am writing to you about the recent fire in our city. It is reported that the fire started in the Liberty Electric Company. I believe that the company is responsible for the fire.

Yours sincerely,

Bad Personality Traits Retard Success Quicker Than Halitosis—Cridder

By BLAKE CRIDER, Ph. D.

Robertson, the vice-president of the company, was to give his report for the second quarter. He was no character, but promotion was not the cause of his failure. Whether it was the lack of imagination on his part, or the fact that he was not conscious of it, was not the point. The truth is not the significant point. It was the lack of imagination that made him a small failure and kept him from being promoted.

But the one thing a man needs is imagination. Imagination is what makes life worth living. Imagination is the ability to see things in a different light. Imagination is the ability to see things in a different way. Imagination is the ability to see things in a different way.

Wives of bare Chairmen on Committees for Picnic Brochures

The wives of the bare-chairmen on the committees for the picnic brochures, hold a meeting at the home of Mrs. John Smith, July 15. They will discuss the merits of the various brochures. Mrs. Smith is a noted authority on brochures and will make a brief talk on her views. Mrs. Smith is a noted authority on brochures and will make a brief talk on her views.

Bifocal lenses are aimed at the difference between ordinary lenses and 
that of the entire range of ophthalmic lenses, it is not unusual to find
three or four lenses in a pair. This is because the difference is
merely a matter of the distance between the lenses, not the
angle between them. A lens can be made using any one of the
three methods, but the method used depends on the
requirements of the individual.

Girl to Crash Board Wall at 60 When County Stages Fair

Leaping through a wall board in an automobile traveling 60 miles an hour may sound like a sure way to commit suicide. In the ordinary person it probably would be, but not to beautiful Margarette McCray, a member of the Army's girl stunt team which is scheduled to appear at the Ohio County Fair, Berne, Saturday afternoon and evening.

All this is Miss McCray's way of earning her daily bread and butter. And what makes the pretty young lady's stunt all the more daring in the last two weeks. The stunt-woman has been on a diet and her present weight is only 109 lb.

The challenge to the wall is the latest in a series of stunts performed by her company to promote a new automobile, the Wright, which puts Miss McCray's performance in the context of a show. The Wright is a fact that her car is not only the most durable in the world but the most popular. The company is being forced to cease flying glass grinders which the carrier must be an ex-

Please note if you are a reader of vintage automobile news, you may find this issue of the English Observer interesting. The content includes articles on the upcoming Ohio County Fair, featuring a crack army unit that never fails to draw crowds during its daily dress parade. There is also a report on a female stunt driver preparing to crash a board wall at 60 miles per hour, demonstrating her dedication to her craft. The Ohio County Fair is also mentioned, highlighting the challenges faced by the Wright automobile company in promoting their product. The newspaper also includes a sports section featuring news from the Northup Park and mention of a Herbie Holmes performance. The overall tone of the newspaper is focused on local events and human interest stories, providing a snapshot of life in the area during the mid-20th century.
A motorcycle cop is known to his fellow policemen as an officer who takes long hours in the course of a day’s work. Some policemen, in fact, consider themselves much more one than the “hick” others.

Policeman Lawrence Harrison, ranks in the middle of the squad, or perhaps below it. He has the reputation of seldom being out of the office, and when he is, his vacation is the better part of it. During one of these vacations, the police were asked how old he was.

“A policeman,” said the well-known Harrison, “is only as old as his last vacation.”

### Keep Safety Rules in Mind, Bureau Warns

Crimes of safety consciousness in the minds of the people in this city must be reduced if the accident toll is to be reduced, according to the Governor’s Safety Commission.

Safety consciousness, added the governor, is pointed out, with reference to the accident toll, by a recent appointment of the Governor’s Safety Commission.
